

F701C

F701C Ferret

A compact and versatile Ferret that complements our existing range of barrel and tube cleaning products. With the introduction of the F701C Ferret we have expanded our range to include cleaning solutions down to barrels and tubes with an ID of just 20mm.

The F701C has been rigorously tested to ensure that it meets our stringent standards and matches the performance and reliability of our existing range of Ferrets.

Along with our latest developments; chamber expanding brush, cerakoted finish, new range of cleaning fluids, enhanced safety couplings and the distribution brush, the Airmesco Bore Cleaning System continues to lead the way in Automated Barrel Cleaning Systems from 20mm up to 203mm for all NATO, non-NATO, chromed, smooth or rifled weapons including mortars and launchers. Fully codified and certificated with over 20 years of exclusive use within the British and US Forces, amongst many others.
