

Enhanced Safety Couplings

Enhanced Safety Couplings

All industrial and military systems are now fitted with push button release compressed air fittings. These replace the dated slide release coupling and make the system safer and more user friendly. The couplings disconnect and safely decompress with one button and incorporate an aerodynamic valve seal design to prevent leaks and optimise airflow.

	Military		Industrial	
Description	Old #	New #	Old #	New #
Foot Valve (F/V)	Y16	Y161	Y2	Y23
Filter Lubricator (F/L)	L21	L21	L5	L51
DWB Ferret Hose			A5/*	A53/*
SWB Ferret Hose (10mm)	A14/*	A141/*		
SWB Ferret Hose (6mm)	A6/*	A61/*		
Air Hose			A1/*	A11/*
Air (F/L-F/V) Hose	A12/*	A121/*		

The introduction of these new products means new part numbers have been allocated, however, the old products will still be available as spares for some considerable time.

*denotes the length of hose

Please note: the L21, military filter lubricator does have a new coupling, but the connections remain the same and so the part number has not changed.
